USER GUIDE
for the mobile application FitLife: Fitness Centers of Kyiv

1. Application purpose

FitLife: Fitness Centers of Kyiv helps users find fitness centers in Kyiv, view information about them, add favorite places, save their visits, and review visit statistics.

2. Main screen

After opening the application, the user can see a list of fitness centers. On the main screen, it is possible to view available places, their addresses, and ratings.

To learn more about a specific fitness center, the user needs to tap on its card.

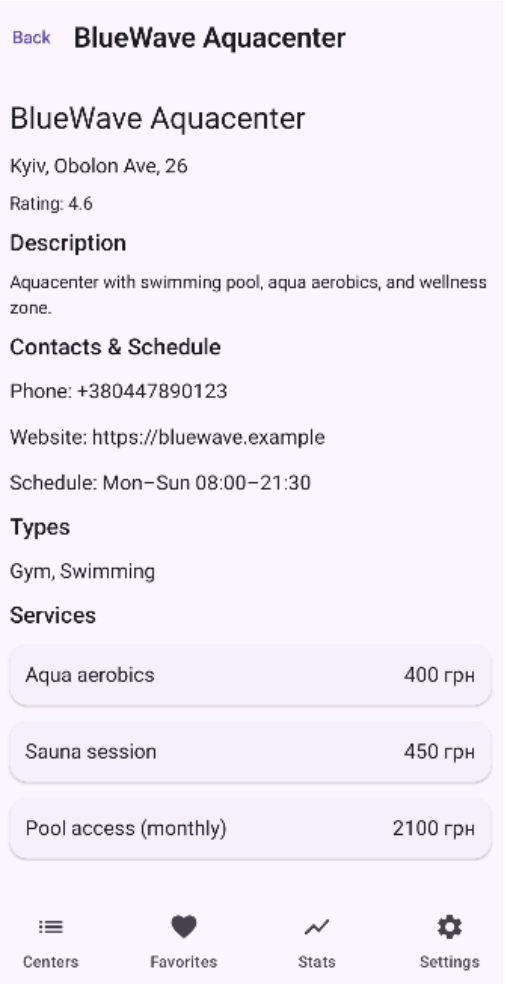

Fig. 2 – Detailed center information

3. Search and filters

On the main screen, the user can quickly find a suitable place using search and filters.

It is possible to:

- enter the name of a fitness center;
- choose the type of place;
- set the desired rating;
- specify the required service;
- set the maximum price.

After that, the list of centers updates automatically. To reset all parameters, the “Clear” button is used.

4. Fitness center information

After selecting a place, a detailed information screen opens.

Here the user can view:

- the name;
- the address;
- the rating;
- the description;
- contact details;

- working hours;
- types of activities;
- available services and their prices.

5. Favorite centers

If the user likes a fitness center, it can be added to the list of favorites. This allows quick access to it later without searching again.

All saved places are displayed on a separate “Favorites” screen.

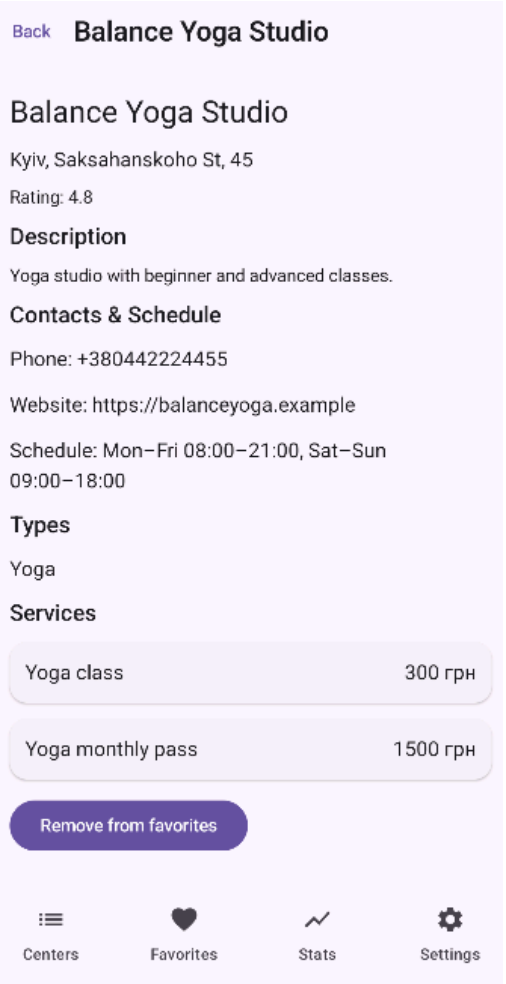

Fig. 7 – “Remove from favorites” button

6. Map and route

On the details screen, the user can see the location of the fitness center on the map.

It is also possible to:

- show the current user location;
- open the route to the selected place.

To build a route, a map application on the phone is opened.

7. Visit history

The application allows the user to save information about a visit to a fitness center.

To do this, the user needs to:

1. choose the date;
2. choose the time;
3. optionally add a comment;
4. tap the save button.

After that, the visit appears in the history.

The details screen also shows the visit history for this place. If needed, the record can be edited or deleted.

The application also provides the ability to save visit history to a file and later load it back into the application. This allows users not to lose their records and reuse them later.

8. Statistics

In the “Statistics” section, the user can view their activity in the form of charts and diagrams.

On this screen, it is possible to see:

- the number of visits by month;
- the centers that were visited most often;
- changes in activity over the recent period.
